

A Briefing Session on
Security in Unbounded Networks

Tuesday, 23rd December, 2003

Al Rostamani HQ, II Floor, Above Nissan Showroom, Opp Danata, Deira, Dubai

With the damage caused by computer viruses increasing by the minute (In August 2003 alone, viruses, caused **\$32.8 billion** in economic damages), it's imperative that companies implement comprehensive protection against malicious code. Yet managing and updating security software and systems can be both costly and complex. Now, SecureSynergy and Al Rostamani helps customers meet this challenge - by providing a comprehensive suite of solutions which ensures that you can build a defence-in-depth and defence-in-breadth strategy. Some of the technologies and solutions areas that would get discussed at this session include - **Managed Security Services, Patch Management Solutions, Security for Service Driven Networks, Web Filtering Tools and Anti-Spam Solutions.**

SecureSynergy, the leading Information Assurance company, has helped enable fast deployment and continuous security to large Enterprises and SME alike with its array of security solutions and products (www.securesynergy.com)

Al Rostamani would like to showcase the benefits of Managed Security Services, Patch Management Solutions and an introduction to Security for Service Driven Networks that could add immense value to your business.

To discover how your organization can directly benefit, we request you to attend one of the unique, highly focused briefings specially organized for you.

Make sure that you there and at the right time!

**Join us on the December 23, at Al Rostamani HQ, Dubai;
9.30 AM onwards. Followed by Lunch.**

By Invitation Only
