

ensure that the patch management issues are addressed comprehensively,” said **Anil Menon, Senior Vice President, SecureSynergy.**

“Traditional manual approach to patch deployment is bound to fail because the volume of patches, network incidents and application vulnerabilities are outstripping the ability of IT staff to keep up to date and ready. PatchEasy is expected to bring in huge savings to Enterprises in terms of money and time while keeping control of the process and reports,” added **Anil.**

The pricing of the automated patch managed solution is based on the number of PCs/Servers managed. PatchEasy will be available with One, Two and Three Year subscription options and will ship simultaneously across ANZ, Asean Countries, Indian Sub continent, CIS Republics, Southern Europe and Middle East markets through SecureSynergy’s distribution and channel organization.

About SecureSynergy

SecureSynergy is a technology consulting services company with operations across India, Middle East, ASEAN and Europe directly and through channels and is the recognized leader in Information Assurance (1).
